

TALHA AHMAD

AI DEVELOPER | FRESH GRADUATE

✉ talhaahmad6229@gmail.com ☎ +92 342 4062298 github.com/talhahmad-webdev Lahore, Pakistan

PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in Artificial Intelligence, Machine Learning, and Generative AI. Hands-on experience building real-world AI systems, including real-time anomaly detection, computer vision applications, and IoT-integrated platforms, using Python, Scikit-learn, OpenCV, and FastAPI. Skilled in applied prompt engineering and LLM tools (ChatGPT, Claude, Gemini) for research and development workflows. Strong communicator with a proven ability to independently design, build, and document end-to-end AI/ML systems.

EDUCATION

Bachelor of Science in Computer Science	Lahore Garrison University	2022 – 2026
Intermediate (ICS)	Garrison College	2020 – 2022
Matriculation (Science)	The Educators, Sahar Campus	2018 – 2020

PROJECTS

Pregnancy Monitoring and Alert System

Final Year Project

- Built an IoT-based real-time patient monitoring system using ESP32, FastAPI, and MongoDB, with a live web dashboard visualizing vitals (heart rate, temperature, ECG)
- Applied machine learning-based anomaly detection on patient vitals to trigger automated health alerts and support clinical reporting

Fault Detection and Self-Healing System

Personal AI / Machine Learning Project

- Built a real-time fault detection system using Python and Scikit-learn (Random Forest, SVM) to classify anomalies in streaming sensor data with high accuracy
- Implemented automated self-healing logic via FastAPI endpoints; documented the model pipeline and system architecture for team review

AI-Based Hand Gesture Virtual Mouse

Personal AI / Computer Vision Project

- Developed a touchless virtual mouse using OpenCV and MediaPipe for real-time hand landmark detection and gesture recognition
- Mapped tracked hand gestures to cursor movement, click, and scroll actions, enabling hands-free computer control without physical hardware

IoT-Based Secure Voting System

Academic Project

- Developed a hardware-integrated voting system with real-time vote processing, data integrity checks, and automated result reporting

Portfolio & Omnifood Website

Personal Web Development Project

- Built responsive, mobile-first websites using HTML5, CSS3, JavaScript, and Bootstrap with a focus on UX optimization

SKILLS

Programming Languages: Python, C++, MS SQL

CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)

AI & Machine Learning: Machine Learning, Computer Vision, Scikit-learn, OpenCV, MediaPipe, Prompt Engineering, Generative AI, LLMs (Applied)

AI Tools: ChatGPT, Claude AI, Gemini, Perplexity

Web & Backend: HTML5, CSS3, JavaScript, REST APIs, FastAPI, Git & GitHub

Productivity Tools: Microsoft Office, Google Workspace, VS Code, WordPress, Canva

Soft Skills: Research & Analysis, Problem Solving, Critical Thinking, Documentation, Team Collaboration, Communication, Time Management, Ownership & Initiative

ADDITIONAL INFORMATION

Languages: English (Proficient), Urdu (Native)

Availability: Immediate Open to Onsite and Remote Positions in Lahore
